

# tablefor7

The **tablefor7** comfortably seats up to 7 persons and has been designed to place occupants in the perfect position for videoconferencing, presentations and collaborative meetings.

Utilising the same design philosophy and tool-less construction as the screen solutions from Ashton Bentley, the **tablefor7** provides the perfect table for any medium to large meeting spaces. Designed to integrate with the Ashton Bentley Connect screen range, this table is a practical and stylish addition to any room.

The table legs used for the **tablefor7** can house 3rd party devices, such as computers, allowing for easy system expansion without the requirement of large equipment cabinets or dedicated rooms to house equipment.

The **tablefor7** also comes complete with our **interface-f** that provides two laptop connections, microphone and semi-automated control of the adjoining Connect system.

INTERFACE - F FLUSH TABLE BOX

TABLE LEG - SSWING OUT BRACKET

### Key Features:

- Compatible with entire Ashton Bentley Connect screen range

- 3x table legs including covers, bases and adjustable feet
- Flush mount table box with **interface-f**
- Cable to connect the table to the Connect chassis
- 7 x chairs (optional)

Technical Data

Configurations

The **tablefor7** is compatible with the Ashton Bentley Connect range of integrated audiovisual room solutions including:

- Connect 1 - single 55" screen
- Connect 2 - twin 55" screens
- Connect 3 - triple 55" screens
- Connect 70 - single 70" screen

For full details please see individual data sheets available on our website [www.ashtonbentley.com](http://www.ashtonbentley.com) or contact us.

The table legs match our chassis bases and have removable covers (with magnetic fastening for easy access) and cable management points. These legs provide space to house third party equipment, such as computers for which we have a universal swing-out bracket.

High quality chairs can also be supplied as an option. We have 3 designs available as standard, however special orders and bespoke options are available on request, subject to availability.

Table Connection Box

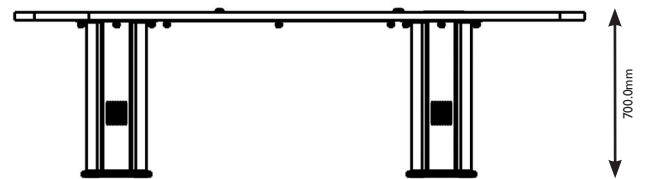

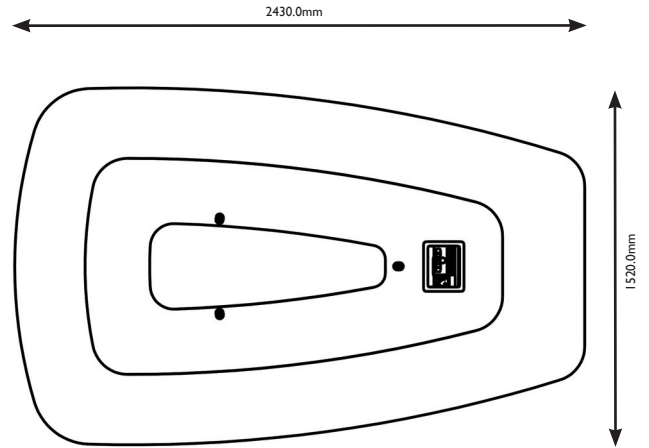

The **interface-f** is flush mounted in the table surface and has a sliding cover which neatly hides PC connectivity, microphone and user control buttons all at the table where it is most convenient for the user.

An intuitive, simple-to-operate button panel, which provides selection between:

- HDMI laptop
- VGA + Audio laptop
- Aux 1
- Aux 2
- Codec
- Audio up/down/mute

Active system management automates the laptop input, screen control, sleep/call mode and power functions allowing users to simply walk in, plug in and present or connect.

For full details please see individual data sheets on *abox core processor and interface-f*.

General

Operating Temperature	0 - 45°C
Operating Humidity	10% - 90% non condensing
Cooling	Built-in ventilation in legs
Enclosure	Ergonomic aluminium and steel chassis
