

GITEX TECHNOLOGY WEEK
EMPOWERING. CONNECTING. ENTERTAINING.

Ashton Bentley exhibit at Gitex Technology Week & Infocomm MEA, Dubai, UAE

Following on from a very successful European launch earlier this year at ISE2013, and USA launch at Infocomm in the USA in June, Ashton Bentley are excited to announce they will be attending the hugely anticipated Gitex Technology Week & Infocomm MEA in Dubai.

Ashton Bentley™ design and manufacture a unique range of complete presentation systems designed to accommodate all of today's Video Conference and Telepresence technologies. Ashton Bentley solutions provide integrated, single source, low cost room "packages" replacing the traditional complex, costly and time-consuming, multi-vendor approach.

Our systems are supplied as complete 'out-of-the-box' solutions with everything required, including: HD Display, video routing/switching/scaling, audio routing and active speakers, control processor and intuitive user interface and IP Tools for remote management, all housed in an ergonomic chassis.

The systems require no skills or tools and can be assembled in minutes. Deployment is simple and quick and provides uniformity across a users site, or globally. Only 4 active components means the systems are simple to operate and maintain wherever they are located.

Ashton Bentley will not only have their own booth, Z-17, at Gitex Technology Week in Dubai, but will also have product on display in two other locations:

Booth ZL-B4. Codec manufacturer Vidyo will demonstrate their twin screen codec solution with one of our integrated Audio Visual environments.

Booth TA-101. Audio Visual and Communication equipment Distributor Granteq will have a single screen Connect system. Granteq have a booth at Infocomm MEA which is co-located with Gitex Technology Week.

END

Ashton Bentley design and manufacture a range of Video Conference, Telepresence (just add Codec) and Presentation environments that simplify all aspects of deployment, operation, support and management. Fully integrated solutions out of a box, assembled in minutes with no tools.

Saving you time, saving you money and making things simple.
Ashton Bentley™ products are designed and manufactured in the United Kingdom.
